**New member: Nadine Mincker**

**pg. 1**

**Notice of Motion**

**pg.2**

**Cowichan Valley Fall Tour**

**pg. 2**

**Ken Denman's Talk**

**pg. 2-3**

**Library Content**

**pg. 3-6**

## **Refreshments**

The following are on the list to bring sweet nourishment to the October meeting: **Pat Murray, Valerie Murray, Frank Neate, Mark and Patty Nixon, Pat Owen, Norman Paddock, and Calvin Parsons.** Please contact **Theresa McMillan to confirm.** Many thanks from all of us! As Theresa is taking on the newsletter duties the club needs someone to step forward to coordinate the refreshments. As people on the monthly list look after serving the tea and coffee, the job entails light work.

## **Welcome New Member**

**Nadine Mincker**

When we moved into our home seventeen years ago there were only two flower beds. Today the yard is surrounded by flower beds and the grass is slowly

disappearing. I am not sure when I became interested in gardening. It seems to have always been a part of my life and helped to keep me focused from the long lonely days early in my marriage with a husband at sea with the coast guard, to the last two years' healing from cancer treatment, my garden has been my salvation and passion. I have too many plants to name but my favourites are Tree Peonies, Day Lilies, Roses, Brugmansia, Lilacs, Daphne ( plants with fragrance) and of course, rhododendrons. I am self taught. I do watch all the gardening programs I can and we are lucky enough to have fabulous gardening magazines with valuable information. Eight years ago I joined the Western Garden Club in Colwood and I have now joined the Victoria Rhododendron Club. For the past eight years I have worked in the garden centre at Canadian Tire (Can West) now Town Centre.

### **Notice of Motion**

A motion will be brought forward at the October meeting to allocate monies for a bursary of \$250 for a student of the Pacific Horticulture College program and operating grants of \$400 each for Glendale Gardens and Woodland (Horticulture Centre of the Pacific) and Abkhazi Garden.

### **VRS Fee Schedule for 2008**

ARS Full Membership \$50  
VRS Membership \$25  
Associate Membership \$10

Dues will be taken for 2008 at the next three meetings: October, November and December by **Dean Goard** and assistant, **Lois Blackmore**.

### **Driver Volunteers for Garth Homer Meetings**

A sheet will be passed around at the October meeting for volunteers to pick up members who no longer drive at night. Your name and phone number will be available to those who would like a drive for the meetings and then

he/she or they will contact you prior to the meeting.

### **Changes: to Proposed Itinerary to the Cowichan Valley October 20th**

**Leave Victoria at 11 a.m. from the Helmcken  
Park and Drive**  
**Car pooling will be the mode of transportation**  
**Arrive Margaret deWeese's garden noon**  
**Lunch at the Quamichan Inn 1 p.m.**  
**pay your own**  
**Cherry Point Winery Tour**  
**\$5 each for tour**  
**or Cherry Point Rhododendrons 2:30 p.m.**  
**Arrive Victoria approx. 5 p.m.**

### **September Speaker Ken Denman gave his talk free of charge to our VRS meeting.**

Ken Denman, lead author on the Intergovernmental Panel of Climate Change (IPCC) 2007 Assessment gave the club members a very technical talk with diagrams to illustrate the main point of his talk was to demonstrate that temperature and other changes have speeded up since man began using fossil fuels. His graphs and maps illustrated the syntheses of hundreds of studies of climate change based on observations spanning the period from the mid seventeenth century to the present, and on computer model projections to the year 2100. Ice cores from Greenland and Antarctica spanning the past 740,000 years capture signatures of change in the atmospheric concentration of the greenhouse gases CO<sub>2</sub> and CH<sub>4</sub>. As well, changes in the heavy isotopes in the snow, deuterium and oxygen-18 are used as 'proxies' for changes in air temperature: during warm periods there is a greater proportion of 'heavy' deuterium (and oxygen-18) in precipitation because of greater evaporation from the oceans, lakes and rivers. Observations since the early 1990s from satellite laser altimeters show a recent rise in sea level of about 3 mm per year or more than one inch per decade. Changes in solar radiation and volcanic activity are also included in current models. A new term for me was "anthropogenic" which refers to climate change resulting from human activities (CO<sub>2</sub> from

burning fossil fuels and increased aerosols from industrial activity) as compared with natural change (resulting from variations in solar radiation and volcanic eruptions). For a range of 'scenarios' of human activities during this century, the collection of models used by the IPCC project a global warming of between 1.4 and 4°C by the year 2100. Including the carbon cycle in these models gives an extra warming of about 1°C. This increase was graphically shown in colour gradations for different regions of the world. Vast areas of Africa through the middle east to Pakistan show increased drought: the scenario for the future of the people there is grim.

In our own part of the world it will likely result in drier summers and wetter winters with greater frequency of wind storms due to the changes in ocean temperatures. However, the scary part for me is the risk to the oceans. Nearly half of the CO<sub>2</sub> from burning fossil fuels ends up in the ocean, where it is increasing the acidity – making it increasingly difficult for organisms that use calcium carbonate to form their 'hard' body parts. The increasing acidity in areas of the North Pacific Ocean will cause calcium carbonate to dissolve from the ocean surface to the bottom. Coral reefs at low latitudes are already threatened, and small creatures in the North Pacific which provide food (and calcium for bones) for finfish are under threat as well. A very interesting observation to me, and certainly to others in the group, was that there are cold water corals living in Knight Inlet on the mainland of BC above Alert Bay that may also be threatened by increasing acidity. Based on this summer's ice extent in the Arctic Ocean, some scientists believe that in less than 30 years the Arctic could be ice free in summer. What scientists formerly predicted would happen in 100 years may happen in under thirty. Other studies indicate that a 4°C increase in temperature would melt the Greenland ice sheet possibly in a period as short as 300 years, but more likely in 1000 years or so. If the volume of ice in the Greenland ice sheet were all to melt and flow into the ocean, it would result in a rise in sea level of close to six metres. Ethics demand that we change our behaviour or we will be blamed by future generations for our profligate use of the world's fossil fuels and the resulting change in the climate, with which they will have to deal.

photo Bill McMillan

**Sets of six rhododendron photo cards will be for sale in November in time for Christmas . This will be the first of several sets so if you have some gorgeous closeups which you would like used, please submit them to [mdeweese@shaw.ca](mailto:mdeweese@shaw.ca)**

### **Abkhazi Fall Garden Lectures**

**Oct. 24th** Wednesday, 7:30pm at Abkhazi Garden  
Title: **Ed Lohbrunner: A plantsman's Eye Influences the Gardens of Victoria.**

As part of the Abkhazi Fall Lecture series Rex Murfitt will talk about Ed Lohbrunner.

Rex has worked with some of the most famous names in alpine gardening. When he came to Victoria he formed a strong friendship with the remarkable plantsman Ed Lohbrunner. Rex will talk about their shared love of plants and Ed's influence on gardening in our city with anecdotes about this most influential gardener.

Tickets are \$8. Please call to reserve as space is limited. 598-8096,

To view the complete lecture series check [www.conservancy.bc.ca/events.asp](http://www.conservancy.bc.ca/events.asp)

**Oct. 25th** Thursday, 7:30pm, St. Ann's Academy

Title: **Garden Beauty – Plants, Scenes and Combinations.**

Pamela Harper will give the Elizabeth England Memorial Lecture, an annual event sponsored by the Victoria Horticultural Society's Hardy Plant Group. Pam is an

internationally recognized garden writer and photographer whose books include 'Colour Echoes' and 'Time Tested Plants: 30 years in a Four Season Garden'. With her stunning photographs and drawing on a lifetime of gardening experience she will show us how to create memorable garden combinations in our own gardens.

Tickets are \$10 and will be available at all Dig This locations, Better Gnomes and Gardens and at the Cadboro Bay Book Company.

### **Rhododendron Species Workshops at UBC**

There seems to be a lot of interest in the Rhododendron Species Workshops at UBC next spring and Doug Justice and I have been able to put together all the registration details sooner than we expected. As a result, we've moved the target dates forward 2 months and there's no reason why we can't start registration in October.

Attached is the registration form which you are free to print and distribute, or publish in your newsletter, beginning October 1st. However, you might want to save a page of newsletter space by simply referring people to the District 1 website where they can download and print a copy for themselves, as of the first week in October. The address is: [www.rhodos.ca](http://www.rhodos.ca)  
There will be a link on the home page that directs people to the registration form.

Because of space limitations at UBC, there are only 25 seats available for the workshops and these will be allocated on a first-come-first-serve basis with priority given to rhododendron club members who have paid for all 4 sessions. **Please encourage your members to register early.**

Completed registration forms, with payment, are to be mailed to me. All the instructions are on the bottom of the form. Detailed information about the workshops is contained in the email I sent to you in August and is continually available on the District 1 website. Feel free to re-publish reminders from that page in your newsletter between now and December.

Ron Knight

District 1 Director

# Registration Form      Rhododendron Species Workshops

At UBC Botanical Garden – Spring 2008

Instructor: Douglas Justice

Coordinator: Ron Knight

**Demographics** --Your name: \_\_\_\_\_

Street: \_\_\_\_\_

City: \_\_\_\_\_ Postal Code: \_\_\_\_\_

Telephone: \_\_\_\_\_ Email: \_\_\_\_\_

Member of which rhodo club? \_\_\_\_\_

**Costs** -- Check which sessions you will be attending:

- |   |      |
|---|------|
| March 1 – rhododendron anatomy; environmental needs; classification | \$35 |
| March 22 – lepidotes and azaleas                                    | \$35 |
| April 5 – elepidotes  | \$35 |
| April 26 – photography; pests, diseases, and other problems         | \$35 |

Total before discount: \$ \_\_\_\_\_

**Discount** – Applies if you meet all 3 of these conditions:

You are a member of a District 1 rhododendron club.

Your registration will be mailed before December 1.

You are registering for all 4 sessions.

If you qualify, subtract \$20, for a subtotal of: \$ \_\_\_\_\_

**Payment** -- Total amount owing is: \$ \_\_\_\_\_

(Hint: For all 4 sessions with discount, enter \$120.)

Please mail a cheque payable to “Ron Knight” to

2710 Walpole Crescent, North Vancouver, BC, V7H 1K8.

NB – 25 spaces will be assigned on a first-come-first-served basis with priority given to rhodo club members who have paid for all 4 sessions. You will be notified before January if your registration is accepted.

**More information** -- Contact Ron Knight at: [rcknight@telus.net](mailto:rcknight@telus.net)
